The cordless electric blind rivet gun is a portable power tool powered by a built-in lithium battery. It is used to efficiently install blind rivets and is widely used in sheet metal processing, automobile repair, aerospace, building assembly and other scenarios. The device drives the rivet pulling mechanism through a motor to complete the riveting operation without the need for an external power supply or air source. It has the advantages of flexible operation, easy portability and strong applicability. Compared with traditional pneumatic or manual rivet guns, the cordless blind rivet gun eliminates the constraints of air pipes and wires, and is particularly suitable for outdoor operations or areas with limited space. At the same time, its intelligent control system can ensure riveting consistency and improve production efficiency and construction quality.
