The cordless pipe belt sander is a portable electric grinding tool designed for 360-degree wrap-around polishing and grinding of cylindrical or curved workpieces such as metal pipes, railings, and stainless steel handrails. The device uses a circular abrasive belt that is tensioned around the guide arm and works closely against the pipe surface. It is battery-driven for cordless operation and is suitable for working environments at high altitudes, outdoors, or without a fixed power supply. Compared with traditional wired models, cordless pipe belt sanders have higher flexibility and safety, and are often equipped with multi-speed regulation, quick-change abrasive belt systems, and overload protection functions. They are widely used in metal processing, construction installation, decoration engineering, and maintenance, and are especially suitable for stainless steel polishing and fine processing on industrial sites.
