The global Cordless Polisher market size is predicted to grow from US$ 981 million in 2025 to US$ 1451 million in 2031; it is expected to grow at a CAGR of 6.7% from 2025 to 2031.

The Cordless Polisher market has witnessed substantial growth in recent years, driven by the increasing demand for convenient and portable polishing solutions. Cordless polishers are power tools designed for polishing and buffing tasks, offering the freedom of movement without the restrictions of a cord. These tools are widely used in automotive detailing, woodworking, metalworking, and various other industries where a smooth and polished surface is desired.

One of the key drivers of the market is the growing preference for cordless tools among professionals and do-it-yourself enthusiasts. Cordless polishers provide increased mobility, allowing users to reach tight spaces or move around without the constraints of a cord. This convenience and freedom of movement have contributed to the popularity of cordless polishers in various applications.

Additionally, advancements in battery technology have significantly improved the performance and runtime of cordless polishers. Lithium-ion batteries, in particular, have become the standard power source for cordless tools, offering longer runtime, faster charging, and reduced weight compared to traditional battery technologies.

Furthermore, the rising focus on environmentally friendly and low-noise operations has increased the demand for cordless polishers. These tools eliminate the need for power cords and are often quieter than their corded counterparts, providing a more pleasant working environment.

However, challenges such as limited runtime and the need for battery recharging or replacement may hinder the market growth. Manufacturers are addressing these challenges by developing more efficient brushless motors, optimizing battery capacity, and providing fast-charging options to enhance user experience.

Overall, the Cordless Polisher market is expected to continue its growth trajectory in the coming years, driven by the demand for portable and convenient polishing solutions.
