The cordless sliding compound miter saw is a portable power tool designed for carpentry, renovation and furniture making, capable of precisely cutting wood, plastic and light metal. It combines the sliding function and the compound miter function: the sliding track allows the saw blade to move forward and backward, expanding the cutting range and suitable for processing wide materials; the compound miter function allows the saw blade to rotate and tilt at multiple angles to achieve complex angle cutting. The cordless design is powered by a rechargeable battery, without the need for a power cord, which improves the portability and flexibility of the tool, making it particularly suitable for use outdoors or under limited power conditions.
