A string trimmer is a tool which uses a flexible monofilament line instead of a blade for cutting grass and other plants near objects, or on steep or irregular terrain. It consists of a cutting tip at the end of a long shaft with a handle. Cordless grass trimmers are similar to gas-powered and electric versions – they have a handle, shaft, cutting head/motor and string dispenser. The biggest difference is that cordless models run on batteries, but there are a few other differences to be aware of, they're light, portable, affordable to run, and easy to take to each and every corner of your garden. There is no gas or oil to mix and pour, and carburetors to clean out.
