A cordless trim router is a portable woodworking power tool designed for fine work such as trimming, chamfering, grooving and carving the edges of wood, plastic or composite materials. Unlike traditional plug-in trimmers, cordless trimmers are powered by built-in lithium batteries, free from the constraints of wires, and improve flexibility and safety when working indoors or outdoors, in complex locations or at heights. This tool is usually equipped with brushless motors, fine-tuning depth adjustment, LED lighting and other functions, and is widely used in furniture manufacturing, woodworking decoration, cabinet installation and DIY creation. With the advancement of battery technology and the trend of lightweight tools, cordless trimmers are gradually replacing some corded devices and becoming an important portable tool for woodworkers and craftsmen.
