The global Coriolis Force Mass Flowmeters market size is predicted to grow from US\$ 2602 million in 2025 to US\$ 4602 million in 2032; it is expected to grow at a CAGR of 8.4% from 2026 to 2032.

In 2025, global sales of Coriolis Force Mass Flowmeter reached approximately 1.4 million units, with an average market price of about USD 1,900 per unit, an annual production capacity of roughly 1.8 million units, and an industry-average gross margin of approximately 30%.

Coriolis Force Mass Flowmeters are flow measurement instruments based on the Coriolis force principle, used to directly measure the mass flow rate of fluids. The device accurately calculates the mass flow rate, density, and temperature of the fluid by detecting changes in the Coriolis force as the fluid passes through the pipeline. Coriolis force mass flowmeters offer high precision and reliability and are widely used in industries such as chemicals, oil and gas, food, and pharmaceuticals, especially in applications requiring high-precision flow measurement.

The upstream and downstream industry chain of Coriolis Force Mass Flowmeters involves several key stages. Upstream, it includes suppliers of flowmeter sensors, electronic components, and precision machining materials, ensuring the high precision and stability of the flowmeters. The midstream involves the manufacturing and assembly of flowmeters, primarily handled by specialized instrument manufacturers for production, calibration, and testing. Downstream, the key applications are in industries such as chemicals, oil and gas, food processing, and pharmaceuticals, where there are extremely high requirements for the precision and reliability of the flowmeters. These flowmeters are widely used in production control, quality monitoring, and process

optimization.
