The global Corn Based Pasta market size is predicted to grow from US\$ 511 million in 2025 to US\$ 756 million in 2032; it is expected to grow at a CAGR of 5.2% from 2026 to 2032.

Corn based pasta is a dried pasta product formulated with corn flour or corn meal as the primary ingredient, produced via extrusion technology followed by slow drying at controlled temperatures to achieve optimal texture and shelf stability. In 2025, global corn based pasta production reached approximately 74,690 ton, with an average global market price of around USD 7,000 per ton. A factory gross profit of USD 2,100 per ton with 30% gross margin. A single line full machine capacity production is around 500 ton per line per year. The upstream is dependent on corn flour, legume flours and packaging materials. The downstream demand is concentrated in health and wellness, retail and foodservice. Corn based pasta often used as a gluten free pasta due to the closest texture to wheat pasta, also has higher fiber, plant protein and low glycemic index. US market is driven by large corn farming. China and India market are driven by rising disposable incomes, urbanization, and a transition toward Westernized/Gluten-free functional foods.
