## Abstracts

The global Corporate Gift Customization Service market size is predicted to grow from US\$ 69087 million in 2025 to US\$ 99001 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

Corporate gift customization services refer to comprehensive solutions that provide corporate clients with personalized design and production of various gifts. These typically encompass creative planning, brand element integration, product selection, packaging design, mass production, and distribution. This service focuses on meeting the needs of businesses in brand communication, customer relationship maintenance, employee motivation, and marketing activities. By enhancing the recognition and emotional value of gifts through customization and differentiation, it serves as an important tool for marketing and corporate culture building.

Against the backdrop of intensifying brand competition and increasingly refined corporate marketing, corporate gift customization services are continuously upgrading. On the one hand, companies are increasingly emphasizing the use of gifts to strengthen brand memory and customer experience, shifting from traditional 'low-price promotional items' to customized gifts that are 'high-quality + creative + practical.' On the other hand, the growing demand for employee benefits and corporate culture building is also driving growth in the internal gift market. Furthermore, e-commerce and supply chain digitalization have made small-batch, multi-batch customization possible, lowering the procurement threshold for businesses. In the future, environmentally friendly materials, sustainable design, digital gifts, and IP collaborations will become important development directions. The industry as a whole has the potential for steady growth, but competition will shift from price-driven to competition based on creativity and supply chain capabilities.
