Corporate Learning Suites (CLS) are software applications that enable organizations to train, develop, and engage their learners. CLS provide multiple learning functions, such as content creation and delivery, assessment and feedback, learner management and tracking, reporting and analytics, and social and collaborative learning. CLS are designed to help organizations improve the skills and knowledge of their employees, customers, partners, and suppliers, as well as to align their learning objectives with their business goals.

The industry trend of CLS is expected to be positive and growing in the coming years. The main drivers for this growth are the increasing need for digital transformation, customer-centricity, omnichannel integration, and AI-enabled decision making in the

retail industry. Some of the challenges that may hinder the growth of the CLS market are the lack of standardization, integration, and scalability of some CLS solutions, as well as the shortage of skilled talent and change management capabilities among some retailers.
