Corson Copper Alloy is a high-performance copper-based alloy, also known as Cu-Ni-Si (copper-nickel-silicon) alloy, developed for applications that require an excellent balance of strength, conductivity, and corrosion resistance. It was originally developed by Japanese metallurgist Yoshitaka Corson and is popular in industries like electronics, automotive, and aerospace. Corson alloys combine copper with small amounts of nickel and silicon, which precipitate as hardening phases within the alloy, giving it enhanced mechanical properties without greatly sacrificing its electrical and thermal conductivity.
