The global Cosmetic Third Party Manufacturing market size is predicted to grow from US\$ 34230 million in 2025 to US\$ 49110 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

Many cosmetic brands choose third-party manufacturing to reduce production costs. Outsourcing manufacturing allows companies to avoid investing in their own production facilities, equipment, and personnel, leading to potential cost savings. By outsourcing manufacturing to third parties, cosmetic companies can focus more on their core competencies such as branding, marketing, and product innovation. This can lead to improved product quality and innovation as well as quicker time-to-market for new products. Third-party manufacturers often have the capacity and expertise to handle fluctuations in production demands. This scalability is particularly beneficial for cosmetic companies that experience seasonal variations in sales or rapid growth.
