Cosmetic Implants are substances placed under the skin or over the body to modify the beauty and physical appearance of an individual. Cosmetic implants are the specially designed medical devices which help individuals regain their appearance and aesthetically replace their damaged body parts after suffering from trauma or accidents. The implants can be placed subdermal or transdermal according to the type of surgical procedure. Cosmetic implants are prosthetics attempted to bring the desired portion of the body back to an acceptable aesthetic norm. Cosmetic implants have a wide applications in cosmetic industry providing higher psychological satisfaction to the people for decorative purposes. Tumor removal, laceration repair, maxillofacial surgery, scar revision and hand surgery are the common reconstruction procedures done by cosmetic implants. Breast augmentation continues to be the leading surgery technique while buttock augmentation, lower body lift and breast lift have shown rapid growth.
