Coworking Space is an arrangement in which workers of different companies share an office space, allowing cost savings and convenience through the use of common infrastructures, such as equipment, utilities, and receptionist and custodial services, and in some cases refreshments and parcel acceptance services. It is attractive to independent contractors, independent scientists, telecommuting larger work teams that want flexibility and to avoid wasted real estate space if some employees are working from home, and work-at-home professionals, and people who travel frequently. Additionally, coworking helps workers avoid the feeling of isolation they may experience while telecommuting, traveling, or working at home alone, and eliminate distractions. Most coworking spaces charge membership dues.

The global Coworking Space market size is projected to grow from US\$ 7366 million in 2024 to US\$ 12230 million in 2030; it is expected to grow at a CAGR of 8.8% from 2024 to 2030.
