The global CPAP Mask market size is predicted to grow from US\$ 2508 million in 2025 to US\$ 3498 million in 2031; it is expected to grow at a CAGR of 5.7% from 2025 to 2031.

Continuous positive airway pressure (CPAP) is a form of positive airway pressure ventilator, which applies mild air pressure on a continuous basis to keep the airways continuously open in people who are able to breathe spontaneously on their own. It is an alternative to positive end-expiratory pressure (PEEP). Both modalities stent the lungs' alveoli open and thus recruit more of the lung's surface area for ventilation. But while PEEP refers to devices that impose positive pressure only at the end of the exhalation, CPAP devices apply continuous positive airway pressure throughout the breathing cycle. Thus, the ventilator itself does not cycle during CPAP, no additional pressure above the level of CPAP is provided, and patients must initiate all of their breaths. CPAP Masks are masks used in CPAP.

Global CAPA mask key players include ResMed, Philips, Fisher & Paykel, Air Liquide, Medical Systems, Dräger, Vyaire Medical, etc. Global top six manufacturers hold a share about 80%. Asia-Pacific is the largest market, with a share about 33%, followed by North America and Middle East & Africa, both have a share about 58 percent. In terms of product, Full-face Mask Type is the largest segment, with a share over 67%. And in terms of application, the largest application is Hospitals & Clinics, followed by Home Care, etc.
