The global Crack Sealing and Crack Filling market size is predicted to grow from US$ 873 million in 2025 to US$ 1115 million in 2031; it is expected to grow at a CAGR of 4.1% from 2025 to 2031.

Sealing and/or filling cracks in existing pavement is the single the most effective procedure that can be performed to extend its lifecycle. By filling and sealing cracks water is prevented from penetrating beneath the asphalt surface where it causes the majority of distresses and failures by weakening the base and sub-base. Unsealed cracks also allow sand, dirt and other non-compressible substances to enter the cracks which interferes with the expansion and contraction of the pavement. This simple procedure is the most cost effective pavement maintenance technique and one that can greatly extend the life of asphalt pavement.

In the crack sealing and crack filling market, North America occupies the main market share, about 54%, and the Asia-Pacific region is the second largest market with a share of 26%.

The main manufacturers of crack sealing and crack filling are SealMaster, Crafco, Colas, GemSeal (CRH), GuardTop.The biggest manufacturer SealMaster took about 44% share.
