The global Creatine Ethyl Ester Malate market size is predicted to grow from US$ 6.91 million in 2025 to US$ 9.98 million in 2032; it is expected to grow at a CAGR of 5.5% from 2026 to 2032.

Creatine ethyl ester malate, also known as 2-hydroxysuccinic acid, has two stereoisomers due to its asymmetric carbon atoms. In nature, it exists in three forms: D-creatine ethyl malate, L-creatine ethyl malate, and their mixture DL creatine ethyl malate. Creatine ethyl ester malic acid is mainly used in the food and pharmaceutical industries. Creatine ethyl ester malic acid is an important component of natural fruit juice. Compared to citric acid, it has a higher acidity but a softer taste. It has a special fragrance, does not damage the mouth and teeth, is conducive to the absorption of amino acids, and does not accumulate fat during metabolism. It is an essential organic acid for the human body and an ideal low calorie food additive. When 50% creatine ethyl malate and 20% citric acid are used together, a rich natural fruit flavor can be presented. It is a cyclic intermediate of biological tricarboxylic acid. Compared to citric acid, creatine ethyl malate has lower calories and better taste. Therefore, it is widely used in foods such as wine, beverages, jam, chewing gum, etc., and has a trend of gradually replacing citric acid. It is one of the most widely used organic acids in the world food industry. It contains natural moisturizing ingredients that can easily dissolve the "adhesive" between dry and scaly dead cells, remove wrinkles on the surface of the skin, make the skin fair, smooth, and elastic, so it is very popular in cosmetics; It can be used to prepare various essence and fragrances for toothpaste, shampoo and other daily chemical products. Compared with citric acid, it has a soft and unique sour taste. Therefore, it is used as a new detergent additive to replace citric acid in the synthesis of high-grade special detergents abroad. Creatine ethyl ester malate can be used to treat diseases such as liver disease, anemia, immune deficiency, uremia, hypertension, liver
