The global Criss-Cross Back Sports Bra market size is predicted to grow from US\$ 856 million in 2025 to US\$ 1296 million in 2031; it is expected to grow at a CAGR of 7.2% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

A criss-cross back sports bra is a sports bra with cross-straps designed to provide women with better support and stability, especially during high-intensity exercise. Criss-cross back sports bras are usually made of stretchy fabrics to ensure comfort and breathability, making them suitable for a variety of sports activities such as running and fitness training.

The growth of the criss-cross back sports bra market is mainly driven by the continued rise in women's fitness craze and the increasing demand for functional and fashionable sportswear. As consumers' requirements for comfort, support and aesthetics of sports equipment continue to increase, the criss-cross back design has become a popular choice for medium and high-intensity sports scenes due to its excellent stability, pressure dispersion ability and fashionable appearance. At the same time, the promotion of social media has accelerated the popularization of product awareness, and the brand's continuous innovation in fabric technology and style design has further stimulated market vitality and consumer preferences.
