Centrifugal pump is a pump where liquid moves and required head forms by means of centrifugal force raising as a result of impeller blades effect on fluid. Cryogenic pumps are classified as single-staged with one impeller and multi-staged with several impellers however with the same working principle. Cryogenic centrifugal pumps are used for large amounts of liquefied industrial gas (liquid oxygen, liquid argon, liquid nitrogen) pumping. It is also reasonable to use pumps of such a type for liquid pumping from one capacity to another.
