## Abstracts

The global Cryogenic Storage Chest Freezers market size is predicted to grow from US\$ 77.5 million in 2025 to US\$ 89.2 million in 2031; it is expected to grow at a CAGR of 2.4% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Cryogenic storage chest freezers typically have a temperature lower than -40° and are used for the storage of drugs, enzymes, chemicals, viruses, bacteria, cell preparations, and tissue samples, among others.

With the steady development of the global economy and the increasing trend of population aging, the investment in medical and health services in various countries has increased year by year, and people's expenditure on health has also increased, and the expenditure on medical equipment, which accounts for a relatively high proportion, has also continued to increase. From a regional point of view, the medical device industry in developed countries and regions such as the United States, Europe, and Japan developed earlier, and has higher requirements for the technical level and quality of medical device products. The market demand is mainly for the upgrading of new products. The market is huge and growing steadily. The emerging market represented by China is the most potential medical device market in the world. The demand for popularization of products and the demand for upgrading coexist, and the growth rate in recent years is higher than the world average. In the future, if the national tax policy, the conditions for the identification of high-tech enterprises, or the company's own circumstances change, so that domestic enterprises do not meet the conditions for the

identification of high-tech enterprises, the enterprises will not be able to continue to enjoy the relevant preferential tax policies, which may have a certain impact on the profitability of domestic enterprises. adverse effects. At the same time, with the escalation of world trade disputes, future cross-border sales will be affected by factors such as the political environment, economic development level, and trade policies of the exporting country. If these factors change adversely, it will have an adverse impact on domestic operations.
