Curb Mounted Prismatic Skylight is a roof lighting device that is installed on a pre-built bezel and directs natural light into the interior space through a prism-shaped transparent or translucent panel. This type of skylight uses a special prism structure design to capture and disperse sunlight, allowing the light to spread evenly into the room while reducing glare and hot spot effects. The bezel design not only facilitates the stable installation of the skylight, but also provides additional insulation and waterproofing. Prismatic skylights are widely used in residential, commercial and industrial buildings due to their efficient lighting capabilities and energy-saving effects, providing buildings with a comfortable natural lighting environment and reducing energy consumption for artificial lighting.
