Cyanoacrylate polymers are derived from cyanoacrylate and related esters. The cyanoacrylate group in the monomer rapidly polymerizes in the presence of water to form long, strong chains. Cyanoacrylate polymers are used in various industries for their strength and durability. They have the ability to bond different materials such as plastics, metals, and elastomers, which are used in automobiles, aerospace & defense, furniture, machinery, consumer goods, and many other end-use industrial segments. Cyanoacrylate polymers are generically known as superglues.
