Cyanocobalamin is a man-made form of vitamin B12. Vitamin B12 is important for growth, cell reproduction, blood formation, and protein and tissue synthesis.

The elderly population has a higher risk of vitamin B12 deficiency due to reduced absorption and intake. Age-related factors, such as decreased stomach acid production and impaired absorption in the gastrointestinal tract, can contribute to inadequate B12 levels. This demographic drives the demand for cyanocobalamin supplements and fortified food products to address their specific nutritional needs.
