The report requires updating with new data and is sent in 48 hours after order is placed.

The global Cyber Insurance market size is predicted to grow from US\$ 16260 million in 2025 to US\$ 98700 million in 2031; it is expected to grow at a CAGR of 35.1% from 2025 to 2031.

Cyber-insurance is an insurance product used to protect businesses and individual users from Internet-based risks, and more generally from risks relating to information technology infrastructure and activities. Risks of this nature are typically excluded from traditional commercial general liability policies or at least are not specifically defined in traditional insurance products. Coverage provided by cyber-insurance policies may include first-party coverage against losses such as data destruction, extortion, theft, hacking, and denial of service attacks; liability coverage indemnifying companies for losses to others caused, for example, by errors and omissions, failure to safeguard data, or defamation; and other benefits including regular security-audit, post-incident public relations and investigative expenses, and criminal reward funds.

Global Cyber Insurance key players include AIG, Chubb, XL Group, Beazley, Allianz, etc. Global top five manufacturers hold a share about 35%. North America is the largest market, with a share about 90%, followed by Europe and Japan, total with a share about 8 percent. In terms of product, Stand-alone Cyber Insurance is the largest segment, with a share about 70%. And in terms of application, the largest application is Financial Institutions, followed by Retail and Wholesale, Healthcare, Business Services, Manufacturing, and Technology, etc.
