Abstracts

The global Cyber Quotient Evaluation market size is predicted to grow from US$ 1657 million in 2025 to US$ 2832 million in 2032; it is expected to grow at a CAGR of 8.1% from 2026 to 2032.

Cyber Quotient Evaluation refers to a set of assessment methods and technologies that use structured indicator systems, standardized questionnaires, control maturity calibration, external exposure data and quantitative risk models to comprehensively score an organization's cybersecurity capabilities, exposure level, governance mechanisms and potential loss risks, in order to form a comparable, quantifiable and sustainable cyber risk "quotient" result.

Gross Profit Margin Levels

In the online quotient assessment sub-market, overall gross profit margins are generally high, ranging from approximately 35% to 55%. Pure SaaS-based CRQ and security rating platforms, due to their extremely low marginal delivery costs and reliance on data and algorithms, often achieve gross profit margins exceeding 60%; however, after factoring in ongoing security intelligence gathering, cloud infrastructure, and algorithm development investments, these margins frequently fall back to the 45%–60% range. On the other hand, the "platform + consulting + insurance brokerage" model, exemplified by Aon CyQu, has a high gross profit margin for the assessment software itself, but the extensive project-based consulting, expert interviews, and scenario workshops lower the overall gross profit margin, typically stabilizing between 35% and 50%. For consulting-led service providers such as the Big Four accounting firms, online quotient assessment is often embedded in a wider range of risk management, compliance, or audit projects, with a gross profit structure similar to high-end

management consulting services, roughly between 35% and 45%. Overall, platform vendors have higher gross margins but require long-term investment in data and algorithms; consulting vendors have slightly lower gross margins but can maintain considerable revenue through high average order values ??and cross-selling.

Industry Drivers

The Cyber ??Quotient Evaluation (CRQ) segment has become one of the fastest-growing sub-segments in the cybersecurity market in recent years, driven by a confluence of pressures. The capital and insurance markets are also driving companies to adopt CRQ and "cyber quotient" tools: insurance companies and brokers need comparable scores and financial models to determine underwriting terms and rates, while investors and analysts want to assess a company's cyber risk management capabilities through unified risk indicators. This is why platforms like CyQu are widely used among 3,000+ clients and 20,000+ users. Furthermore, regulatory compliance (such as operational risks in the financial industry, cybersecurity requirements for critical infrastructure, and data protection laws) increasingly emphasizes "continuous assessment" and "quantitative disclosure," forcing companies to shift from one-off penetration tests and compliance checks to annual or even quarterly cyber quotient assessments. As AI-driven attacks, supply chain attacks, and cross-border data flow risks intensify, enterprises increasingly need a unified language of "scores + loss amounts" to support budget negotiations, insurance procurement, third-party management, and M&A decisions. This strong demand for "communicable, benchmarkable, and measurable" data is continuously driving up the penetration rate and single-customer value of the network quotient assessment market.

Report Scope

LPI (LP Information)' newest research report, the “Cyber Quotient Evaluation Industry Forecast” looks at past sales and reviews total world Cyber Quotient Evaluation sales in 2025, providing a comprehensive analysis by region and market sector of projected Cyber Quotient Evaluation sales for 2026 through 2032. With Cyber Quotient Evaluation sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Cyber Quotient Evaluation industry.

This Insight Report provides a comprehensive analysis of the global Cyber Quotient Evaluation landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyses the strategies of leading global companies with a focus on

Cyber Quotient Evaluation portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Cyber Quotient Evaluation market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Cyber Quotient Evaluation and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Cyber Quotient Evaluation.

This report presents a comprehensive overview, market shares, and growth opportunities of Cyber Quotient Evaluation market by product type, application, key players and key regions and countries.

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global Cyber Quotient Evaluation Market Size (2021-2032)
  2.1.2 Cyber Quotient Evaluation Market Size CAGR by Region (2021 VS 2025 VS 2032)
  2.1.3 World Current & Future Analysis for Cyber Quotient Evaluation by Country/Region (2021, 2025 & 2032)
2.2 Cyber Quotient Evaluation Segment by Type
  2.2.1 Control Assessment Type
  2.2.2 External Security Rating Type
  2.2.3 Others
  2.2.4 Cyber Quotient Evaluation Market Size by Type
    2.2.4.1 Cyber Quotient Evaluation Market Size CAGR by Type (2021 VS 2025 VS 2032)
    2.2.4.2 Global Cyber Quotient Evaluation Market Size Market Share by Type (2021-2026)
2.3 Cyber Quotient Evaluation Segment by Evaluate Service Model
  2.3.1 Subscription-Based Service Providers
  2.3.2 Project-Based Service Providers
  2.3.3 Others
  2.3.4 Cyber Quotient Evaluation Market Size by Evaluate Service Model
