As a class of peptides with a cyclic structure, cyclic peptides can be traced back to biologically active molecules in nature. Due to their cyclic structure, cyclic peptides have higher chemical and metabolic stability than linear peptides. This stability gives cyclic peptides a longer half-life in the body. The cyclic structure of cyclic peptides helps them penetrate cell membranes more easily, which allows them to enter the interior of cells more effectively and exert their biological activity. Cyclic peptide skin care products help to re-tighten and brighten the skin while improving its firmness and surface texture. It also helps to shrink pores while regulating the many functions of sebum secretion.
