Cyperus scariosus, also known as cypriol, and in Hindi as Nagarmotha, is identified by its woody and earthy fragrance, a hybrid scent existing between cedar, vetiver and patchouli with fleeting notes of cinnamon.

Cypriol, the plant, belongs to the papyrus family and grows in the damp jungles of Bengal and Uttar Pradesh in India. Its essential oil is produced through the distillation of its roots. Although highly prized in India for its anti-inflammatory properties, cypriol is loved by fragrance devotees for its signature woody and spicy character.
