DL-Alpha tocopheryl acetate, or Vitamin E Acetate, is the stable form of Vitamin E most often used in cosmetic formulations for its skin care benefits. Vitamin E protects cell membranes from damage by oxygen free radicals. It can prevent premature aging of the skin induced by UV irradiation and lipid peroxidation.

D-alpha Tocopheryl Acetate is commonly used in dietary supplements due to its antioxidant properties and potential health benefits. The global market for dietary supplements, including vitamin E supplements, has been experiencing steady growth. Consumers are increasingly focused on health and wellness, which has driven the demand for nutritional supplements containing vitamin E. D-alpha Tocopheryl Acetate is also a popular ingredient in the cosmetics and skincare industry. It is used in various skincare products, including creams, lotions, and serums, for its moisturizing and antioxidant properties. The beauty and personal care industry's growth can influence the demand for this ingredient.
