Abstracts

The global Dairy Free Vegan Cheese market size is predicted to grow from US\$ 2590 million in 2025 to US\$ 4690 million in 2032; it is expected to grow at a CAGR of 9.0% from 2026 to 2032.

Dairy free vegan cheese is a non-dairy analogue aimed at vegans and other people who want to avoid animal products, including those who are lactose-intolerant. As with plant milk, dairy free vegan cheese can be made from cashews, sesame seeds, sunflower seeds, soybeans, coconut oil, rice, almonds and other nuts, and nutritional yeast.

The rising acceptance of veganism, especially among millennials, has been driving market growth. Shifting consumer food preferences and evolving trends in the food and beverage industry are driving global demand for vegan cheese. In recent years, cases of lactose intolerance and other food-related allergies have increased in children and adults, changing consumer food preferences. Growing awareness about the negative impact of the dairy industry on the environment, encouraging consumers to opt for plant-based products, and an inclination towards vegetarian and vegan diets are expected to drive industry growth in the Hotel/Restaurant/Cafe (HoReCa) sector.
