Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

The new DC 'data center' models are high-performing airfoil blade type, and offer the lowest AMCA Class 1A leakage rating for energy savings. They also offer a new coupler option that joins two damper sections without a jackshaft allowing an actuator to be mounted on side of frame to provide a narrow profile when space is limited. In addition, the DC models have enhanced operational performance with less moving parts on larger multi-section high sizes. Available in galvanized steel and extruded aluminum.
