Abstracts

The global Data Center Insulation market size is predicted to grow from US\$ 631 million in 2025 to US\$ 1453 million in 2032; it is expected to grow at a CAGR of 12.8% from 2026 to 2032.

Data Center Insulation refers to thermal insulation materials specifically designed or suitable for use in data center building envelopes, interior functional spaces, and mechanical cooling infrastructure such as HVAC and liquid cooling systems to restrict unwanted heat transfer and maintain a stable and controlled thermal environment. Typical applications include exterior walls, roofs, interior partitions, ceilings, raised floors, chilled water piping, refrigerant lines, air ducts, chillers, tanks, valves, and other cooling equipment. These materials reduce heat transfer and thermal losses, help maintain stable temperatures throughout data halls and cooling systems, improve cooling energy efficiency, and control vapor ingress and condensation on below-ambient surfaces. Depending on data center safety and reliability requirements, they may also provide fire protection, acoustic attenuation, moisture resistance, vapor control, low-dust performance, and long-term durability. Common material systems include mineral wool and stone wool, fiberglass, flexible closed-cell elastomeric foam, polyolefin foam, phenolic foam, polyurethane and polyisocyanurate foam, cellular glass, and other high-performance thermal insulation materials.

Key Findings

Mechanical cooling systems are the most insulation-intensive application area because chilled-water piping and ductwork require extensive thermal and condensation control

Hyperscale and cloud data centers form the largest downstream demand pool as AI and

cloud infrastructure continue expanding

Flexible elastomeric foam leads mechanical insulation applications while mineral fiber and rigid foam are important in building-envelope systems

Market Trends

The Data Center Insulation market is evolving from conventional building insulation toward mission-critical thermal-management systems that combine energy efficiency, condensation control, fire resilience, low smoke, cleanliness and installation reliability. AI accelerators and high-density computing are accelerating the adoption of direct liquid cooling and more complex facility-side chilled-water infrastructure, increasing the importance of low-permeability insulation around piping, fittings, valves, tanks and cooling equipment rather than eliminating insulation demand. High heat density as the strongest driver for direct liquid cooling adoption, while mechanical-insulation suppliers are developing products specifically for air- and water-cooled data-center systems. Product development is also moving toward factory-applied adhesives, self-sealing tubes, pre-cut sheets and prefabricated components that reduce field cutting, installation time and seam variability. At the building-envelope level, noncombustible stone wool and insulated metal panels are increasingly specified to combine thermal efficiency with fire resistance, moisture management and acoustic control. Environmental product declarations, recyclable materials and lower-embodied-carbon products are becoming more relevant as hyperscalers and colocation operators extend sustainability requirements from operating energy to construction materials.

Market Dynamics

Drivers

Growth is primarily driven by rapid expansion of cloud computing, AI infrastructure, hyperscale campuses and colocation capacity, together with the increasing power density of servers and the corresponding need for high-capacity cooling infrastructure. The IEA expects global data-center electricity consumption to more than double by 2030, with AI representing the most important incremental driver, indicating sustained investment in cooling, power and building infrastructure. Data centers contain extensive chilled-water piping and duct networks, often including tens of thousands of linear feet of exterior piping on large facilities, creating substantial demand for condensation-resistant and energy-efficient insulation. Reliability requirements provide an additional structural driver because wet insulation, uncontrolled condensation or thermal losses

can impair cooling efficiency and increase corrosion and maintenance risk in continuously operated facilities.

Restraints

Market expansion is constrained by highly project-specific specifications, different fire and smoke codes across regions, installation complexity and the absence of a single standardized pricing or volume unit. Flexible insulation tubes are commonly specified by pipe diameter, wall thickness and linear length, sheets and boards by area and thickness, mineral-fiber products by density and volume, while insulated panels and removable blankets are often priced as fabricated systems. This limits standardization and increases engineering and procurement complexity. Below-ambient systems also require rigorous vapor-control design and seam integrity; inadequate thickness or installation can allow vapor ingress and condensation, reduce thermal performance and increase corrosion risk.

Opportunities

The strongest opportunities are emerging in high-density AI data centers, large-scale liquid-assisted cooling systems, hyperscale and wholesale colocation campuses, and retrofit projects that upgrade existing chilled-water and HVAC networks. Direct liquid cooling increases the amount and criticality of water-side infrastructure within many facilities, supporting demand for insulation around larger pipes, distribution loops, valves and equipment exposed to below-ambient operating conditions. Suppliers also have opportunities to move from commodity material sales toward engineered systems, including pre-cut large-diameter pipe insulation, self-sealing products, factory-prefabricated components, low-dust solutions and removable insulation for generators and exhaust equipment. Rapid data-center construction in China and other Asia-Pacific markets provides additional opportunities for regional manufacturers with competitive cost structures and established HVAC distribution channels.

Challenges

The principal challenge is that data-center cooling architecture is changing faster than traditional insulation specification cycles. Operators must support conventional air cooling, chilled-water systems and increasingly direct liquid cooling within the same campus, making future insulation requirements less uniform. Power availability, construction schedules and supply-chain delays also constrain data-center deployment, while rapid project execution increases the risk of poor sealing, inconsistent joints and installation defects. For mechanical insulation, long-term control of condensation, vapor

drive and corrosion under insulation remains a technical challenge, particularly in hot and humid climates and on outdoor chilled-water systems. Suppliers therefore compete not only on thermal conductivity but also on system design support, vapor resistance, fire certification, fabrication efficiency and contractor training.

Industry Chain Analysis

The upstream chain consists of NBR, PVC, EPDM and other elastomers; polyethylene and other polyolefins; polyurethane and polyisocyanurate feedstocks; glass fibers; basalt and mineral raw materials; blowing agents, binders, adhesives, vapor barriers, aluminum and polymer facings, and protective jacketing materials. Midstream manufacturers convert these inputs through foaming, fiber spinning, curing, lamination, panel assembly and fabrication into tubes, pipe sections, sheets, rolls, boards, insulated panels and removable blankets. Value creation increasingly depends on controlling thermal conductivity, vapor permeability, fire and smoke performance, dimensional stability and installation productivity rather than raw material alone. Downstream channels include distributors, insulation contractors, MEP contractors, data-center EPC firms, cooling-system suppliers and building-envelope contractors, with final demand generated by hyperscalers, cloud operators, colocation providers, enterprises and public institutions. Manufacturers with specification support, BIM and engineering capabilities, certified installation networks and prefabrication services can capture higher value because installation quality directly affects condensation control and lifecycle performance.

Segment Insights

By material type, Flexible Elastomeric Foam is the most important category for chilled-water piping, refrigerant lines and mechanical equipment because its closed-cell structure combines thermal resistance with low water-vapor permeability and condensation control. Armacell, K-FLEX, AEROFLEX, Kaimann and several Chinese manufacturers participate strongly in this segment. Mineral Fiber Insulation, particularly stone wool and fiberglass, has a stronger position in walls, roofs, ducts and fire-resistant assemblies, while Rigid Polymer Foam Insulation such as PIR, PUR, XPS and EPS is concentrated in roof, wall and insulated-panel applications. Polyolefin Foam provides a lightweight closed-cell alternative for selected piping, duct, floor and airflow-management applications, while specialty materials such as polyimide foam, cellular glass, aerogel and thermal coatings address higher-temperature, space-constrained or specialized environments.

By product form, tubes and preformed pipe sections are closely linked to mechanical cooling networks; sheets, rolls and blankets provide flexibility for large-diameter piping, ducts, tanks and irregular equipment; rigid boards and insulated panels serve building envelopes; and removable systems address generator exhaust and maintainable equipment. Pricing therefore differs substantially by format and specification. By application area, Cooling & Mechanical System Insulation represents the largest demand pool, followed by Building Envelope Insulation and Data Hall & Airflow Management Insulation, while high-temperature auxiliary equipment is captured mainly within the remaining specialty applications.

Downstream Market Opportunities

Hyperscale & Cloud Data Centers represent the largest downstream opportunity because they combine large campuses, high server density and extensive cooling infrastructure. Colocation & Managed Data Centers are another major growth market as third-party operators expand large campuses for cloud and AI customers, generating repeat demand for standardized insulation specifications across multiple buildings and phases. Enterprise & Institutional Data Centers remain a stable installed base covering financial institutions, telecom operators, government facilities, healthcare, manufacturing, universities and research computing, with opportunities increasingly linked to cooling upgrades and energy-efficiency retrofits.

Regional Insights

North America is assessed as the largest regional demand market, supported by the scale of U.S. hyperscale, cloud and colocation construction and the rapid increase in electricity required by data-center infrastructure. The IEA expects the United States to account for the largest share of incremental data-center electricity demand through 2030, followed by China, reinforcing strong medium-term demand for cooling and facility infrastructure in both markets. North America also has a broad supplier base covering mechanical insulation, mineral fiber, insulated panels and specialty removable blankets.

Asia-Pacific is one of the most important expansion regions, with China combining rapidly growing digital infrastructure demand with a sizeable domestic insulation manufacturing base. Huamei lists multiple Chinese cloud and data-center projects, while Wincell has developed insulation systems specifically for data-center piping applications. Europe remains an important high-specification market where fire safety, thermal efficiency, vapor control and environmental documentation strongly influence material selection; major European suppliers including ROCKWOOL, Armacell, K-FLEX,

Kingspan, SOPREMA and Thermaflex have broad regional and international positions.

Competitive Landscape Analysis

Competition is structurally fragmented because no single material system addresses every data-center insulation requirement. Kingspan Group, Owens Corning, ROCKWOOL, Johns Manville, Carlisle SynTec Systems, SOPREMA, Sika and Metl-Span are strong in building-envelope, mineral-fiber, rigid-board or insulated-panel applications, while Armacell, K-FLEX, AEROFLEX, Kaimann and Thermaflex compete more directly in chilled-water, refrigeration and HVAC insulation. Chinese manufacturers including Huamei Energy-Saving Technology Group, Shenzhou Energy Saving Technology Group, Wincell Insulation Group and Kingway provide domestic alternatives across elastomeric foam, glass wool, stone wool and related thermal-insulation products. Boyd, InsulTech, Firwin, Auburn Manufacturing, Orange County Thermal Industries and Syneffex address narrower specialty applications such as airflow barriers, removable blankets, high-temperature insulation and coatings. Competitive differentiation is increasingly based on specification support, fire and smoke performance, condensation resistance, low permeability, prefabrication, low-dust characteristics and lifecycle sustainability rather than thermal conductivity alone.

Report Scope

LPI (LP Information)' newest research report, the “Data Center Insulation Industry Forecast” looks at past sales and reviews total world Data Center Insulation sales in 2025, providing a comprehensive analysis by region and market sector of projected Data Center Insulation sales for 2026 through 2032. With Data Center Insulation sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Data Center Insulation industry.

This Insight Report provides a comprehensive analysis of the global Data Center Insulation landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyses the strategies of leading global companies with a focus on Data Center Insulation portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Data Center Insulation market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Data Center Insulation and breaks down the forecast by

Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Data Center Insulation.

This report presents a comprehensive overview, market shares, and growth opportunities of Data Center Insulation market by product type, application, key players and key regions and countries.

Market Segmentation

Segmentation by Type:

Flexible Elastomeric Foam

Mineral Fiber Insulation

Rigid Polymer Foam Insulation

Polyolefin Foam Insulation

Others

Segmentation by Product Form:

Tubes & Preformed Pipe Sections

Sheets, Rolls & Blankets

Rigid Boards & Insulated Panels

Others

Segmentation by Application Area:

Cooling & Mechanical System Insulation

Building Envelope Insulation

Data Hall & Airflow Management Insulation

Others

Segmentation by Application:

Hyperscale & Cloud Data Centers

Colocation & Managed Data Centers

Enterprise & Institutional Data Centers

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

Germany

France

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analyzing the company's coverage, product portfolio, its market penetration.

Kingspan Group

Owens Corning

ROCKWOOL

Johns Manville

Carlisle SynTec Systems

SOPREMA

Sika

Armacell

K-FLEX

Metl-Span

AEROFLEX

The Supreme Industries

Trocellen

Kaimann

Clark Pacific

Thermaflex

Boyd

InsulTech

Firwin

Auburn Manufacturing

Orange County Thermal Industries

Syneffex

Huamei Energy-Saving Technology Group

Shenzhou Energy Saving Technology Group

Wincell Insulation Group

Kingway

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

- 2.1 World Market Overview
 - 2.1.1 Global Data Center Insulation Market Size (2021-2032)
 - 2.1.2 Data Center Insulation Market Size CAGR by Region (2021 VS 2025 VS 2032)
 - 2.1.3 World Current & Future Analysis for Data Center Insulation by Country/Region (2021, 2025 & 2032)
- 2.2 Data Center Insulation Segment by Type
 - 2.2.1 Flexible Elastomeric Foam
 - 2.2.2 Mineral Fiber Insulation
 - 2.2.3 Rigid Polymer Foam Insulation
 - 2.2.4 Polyolefin Foam Insulation
 - 2.2.5 Others
 - 2.2.6 Data Center Insulation Market Size by Type
 - 2.2.6.1 Data Center Insulation Market Size CAGR by Type (2021 VS 2025 VS 2032)
 - 2.2.6.2 Global Data Center Insulation Market Size Market Share by Type (2021-2026)
- 2.3 Data Center Insulation Segment by Product Form
 - 2.3.1 Tubes & Preformed Pipe Sections
 - 2.3.2 Sheets, Rolls & Blankets
 - 2.3.3 Rigid Boards & Insulated Panels
 - 2.3.4 Others
 - 2.3.5 Data Center Insulation Market Size by Product Form
 - 2.3.5.1 Data Center Insulation Market Size CAGR by Product Form (2021 VS 2025 VS 2032)
 - 2.3.5.2 Global Data Center Insulation Market Size Market Share by Product Form (2021-2026)

2.4 Data Center Insulation Segment by Application Area

2.4.1 Cooling & Mechanical System Insulation

2.4.2 Building Envelope Insulation

2.4.3 Data Hall & Airflow Management Insulation

2.4.4 Others

2.4.5 Data Center Insulation Market Size by Application Area

2.4.5.1 Data Center Insulation Market Size CAGR by Application Area (2021 VS 2025 VS 2032)

2.4.5.2 Global Data Center Insulation Market Size Market Share by Application Area (2021-2026)

2.5 Data Center Insulation Segment by Application

2.5.1 Hyperscale & Cloud Data Centers

2.5.2 Colocation & Managed Data Centers

2.5.3 Enterprise & Institutional Data Centers

2.5.4 Data Center Insulation Market Size by Application

2.5.4.1 Data Center Insulation Market Size CAGR by Application (2021 VS 2025 VS 2032)

2.5.4.2 Global Data Center Insulation Market Size Market Share by Application (2021-2026)

3 DATA CENTER INSULATION MARKET SIZE BY PLAYER

3.1 Data Center Insulation Market Size Market Share by Player

3.1.1 Global Data Center Insulation Revenue by Player (2021-2026)

3.1.2 Global Data Center Insulation Revenue Market Share by Player (2021-2026)

3.2 Global Data Center Insulation Key Players Head office and Products Offered

3.3 Market Concentration Rate Analysis

3.3.1 Competition Landscape Analysis

3.3.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.4 New Products and Potential Entrants

3.5 Mergers & Acquisitions, Expansion

4 DATA CENTER INSULATION BY REGION

4.1 Data Center Insulation Market Size by Region (2021-2026)

4.2 Global Data Center Insulation Annual Revenue by Country/Region (2021-2026)

4.3 Americas Data Center Insulation Market Size Growth (2021-2026)

4.4 APAC Data Center Insulation Market Size Growth (2021-2026)

4.5 Europe Data Center Insulation Market Size Growth (2021-2026)

4.6 Middle East & Africa Data Center Insulation Market Size Growth (2021-2026)

5 AMERICAS

5.1 Americas Data Center Insulation Market Size by Country (2021-2026)

5.2 Americas Data Center Insulation Market Size by Type (2021-2026)

5.3 Americas Data Center Insulation Market Size by Application (2021-2026)

5.4 United States

5.5 Canada

5.6 Mexico

5.7 Brazil

6 APAC

6.1 APAC Data Center Insulation Market Size by Region (2021-2026)

6.2 APAC Data Center Insulation Market Size by Type (2021-2026)

6.3 APAC Data Center Insulation Market Size by Application (2021-2026)

6.4 China

6.5 Japan

6.6 South Korea

6.7 Southeast Asia

6.8 India

6.9 Australia

7 EUROPE

7.1 Europe Data Center Insulation Market Size by Country (2021-2026)

7.2 Europe Data Center Insulation Market Size by Type (2021-2026)

7.3 Europe Data Center Insulation Market Size by Application (2021-2026)

7.4 Germany

7.5 France

7.6 UK

7.7 Italy

7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa Data Center Insulation by Region (2021-2026)

8.2 Middle East & Africa Data Center Insulation Market Size by Type (2021-2026)

8.3 Middle East & Africa Data Center Insulation Market Size by Application (2021-2026)

8.4 Egypt

8.5 South Africa

8.6 Israel

8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 GLOBAL DATA CENTER INSULATION MARKET FORECAST

10.1 Global Data Center Insulation Forecast by Region (2027-2032)

10.1.1 Global Data Center Insulation Forecast by Region (2027-2032)

10.1.2 Americas Data Center Insulation Forecast

10.1.3 APAC Data Center Insulation Forecast

10.1.4 Europe Data Center Insulation Forecast

10.1.5 Middle East & Africa Data Center Insulation Forecast

10.2 Americas Data Center Insulation Forecast by Country (2027-2032)

10.2.1 United States Market Data Center Insulation Forecast

10.2.2 Canada Market Data Center Insulation Forecast

10.2.3 Mexico Market Data Center Insulation Forecast

10.2.4 Brazil Market Data Center Insulation Forecast

10.3 APAC Data Center Insulation Forecast by Region (2027-2032)

10.3.1 China Data Center Insulation Market Forecast

10.3.2 Japan Market Data Center Insulation Forecast

10.3.3 Korea Market Data Center Insulation Forecast

10.3.4 Southeast Asia Market Data Center Insulation Forecast

10.3.5 India Market Data Center Insulation Forecast

10.3.6 Australia Market Data Center Insulation Forecast

10.4 Europe Data Center Insulation Forecast by Country (2027-2032)

10.4.1 Germany Market Data Center Insulation Forecast

10.4.2 France Market Data Center Insulation Forecast

10.4.3 UK Market Data Center Insulation Forecast

10.4.4 Italy Market Data Center Insulation Forecast

10.4.5 Russia Market Data Center Insulation Forecast

10.5 Middle East & Africa Data Center Insulation Forecast by Region (2027-2032)

10.5.1 Egypt Market Data Center Insulation Forecast

10.5.2 South Africa Market Data Center Insulation Forecast

10.5.3 Israel Market Data Center Insulation Forecast

10.5.4 Turkey Market Data Center Insulation Forecast

10.6 Global Data Center Insulation Forecast by Type (2027-2032)

10.7 Global Data Center Insulation Forecast by Application (2027-2032)

10.7.1 GCC Countries Market Data Center Insulation Forecast

11 KEY PLAYERS ANALYSIS

11.1 Kingspan Group

11.1.1 Kingspan Group Company Information

11.1.2 Kingspan Group Data Center Insulation Product Offered

11.1.3 Kingspan Group Data Center Insulation Revenue, Gross Margin and Market Share (2021-2026)

11.1.4 Kingspan Group Main Business Overview

11.1.5 Kingspan Group Latest Developments

11.2 Owens Corning

11.2.1 Owens Corning Company Information

11.2.2 Owens Corning Data Center Insulation Product Offered

11.2.3 Owens Corning Data Center Insulation Revenue, Gross Margin and Market Share (2021-2026)

11.2.4 Owens Corning Main Business Overview

11.2.5 Owens Corning Latest Developments

11.3 ROCKWOOL

11.3.1 ROCKWOOL Company Information

11.3.2 ROCKWOOL Data Center Insulation Product Offered

11.3.3 ROCKWOOL Data Center Insulation Revenue, Gross Margin and Market Share (2021-2026)

11.3.4 ROCKWOOL Main Business Overview

11.3.5 ROCKWOOL Latest Developments

11.4 Johns Manville

11.4.1 Johns Manville Company Information

11.4.2 Johns Manville Data Center Insulation Product Offered

11.4.3 Johns Manville Data Center Insulation Revenue, Gross Margin and Market Share (2021-2026)

11.4.4 Johns Manville Main Business Overview

11.4.5 Johns Manville Latest Developments

11.5 Carlisle SynTec Systems

11.5.1 Carlisle SynTec Systems Company Information

11.5.2 Carlisle SynTec Systems Data Center Insulation Product Offered

11.5.3 Carlisle SynTec Systems Data Center Insulation Revenue, Gross Margin and Market Share (2021-2026)

11.5.4 Carlisle SynTec Systems Main Business Overview

11.5.5 Carlisle SynTec Systems Latest Developments

11.6 SOPREMA

11.6.1 SOPREMA Company Information

11.6.2 SOPREMA Data Center Insulation Product Offered

11.6.3 SOPREMA Data Center Insulation Revenue, Gross Margin and Market Share (2021-2026)

11.6.4 SOPREMA Main Business Overview

11.6.5 SOPREMA Latest Developments

11.7 Sika

11.7.1 Sika Company Information

11.7.2 Sika Data Center Insulation Product Offered

11.7.3 Sika Data Center Insulation Revenue, Gross Margin and Market Share (2021-2026)

11.7.4 Sika Main Business Overview

11.7.5 Sika Latest Developments

11.8 Armacell

11.8.1 Armacell Company Information

11.8.2 Armacell Data Center Insulation Product Offered

11.8.3 Armacell Data Center Insulation Revenue, Gross Margin and Market Share (2021-2026)

11.8.4 Armacell Main Business Overview

11.8.5 Armacell Latest Developments

11.9 K-FLEX

11.9.1 K-FLEX Company Information

11.9.2 K-FLEX Data Center Insulation Product Offered

11.9.3 K-FLEX Data Center Insulation Revenue, Gross Margin and Market Share (2021-2026)

11.9.4 K-FLEX Main Business Overview

11.9.5 K-FLEX Latest Developments

11.10 Metl-Span

11.10.1 Metl-Span Company Information

11.10.2 Metl-Span Data Center Insulation Product Offered

11.10.3 Metl-Span Data Center Insulation Revenue, Gross Margin and Market Share

(2021-2026)

11.10.4 Metl-Span Main Business Overview

11.10.5 Metl-Span Latest Developments

11.11 AEROFLEX

11.11.1 AEROFLEX Company Information

11.11.2 AEROFLEX Data Center Insulation Product Offered

11.11.3 AEROFLEX Data Center Insulation Revenue, Gross Margin and Market Share

(2021-2026)

11.11.4 AEROFLEX Main Business Overview

11.11.5 AEROFLEX Latest Developments

11.12 The Supreme Industries

11.12.1 The Supreme Industries Company Information

11.12.2 The Supreme Industries Data Center Insulation Product Offered

11.12.3 The Supreme Industries Data Center Insulation Revenue, Gross Margin and

Market Share (2021-2026)

11.12.4 The Supreme Industries Main Business Overview

11.12.5 The Supreme Industries Latest Developments

11.13 Trocellen

11.13.1 Trocellen Company Information

11.13.2 Trocellen Data Center Insulation Product Offered

11.13.3 Trocellen Data Center Insulation Revenue, Gross Margin and Market Share

(2021-2026)

11.13.4 Trocellen Main Business Overview

11.13.5 Trocellen Latest Developments

11.14 Kaimann

11.14.1 Kaimann Company Information

11.14.2 Kaimann Data Center Insulation Product Offered

11.14.3 Kaimann Data Center Insulation Revenue, Gross Margin and Market Share

(2021-2026)

11.14.4 Kaimann Main Business Overview

11.14.5 Kaimann Latest Developments

11.15 Clark Pacific

11.15.1 Clark Pacific Company Information

11.15.2 Clark Pacific Data Center Insulation Product Offered

11.15.3 Clark Pacific Data Center Insulation Revenue, Gross Margin and Market

Share (2021-2026)

11.15.4 Clark Pacific Main Business Overview

11.15.5 Clark Pacific Latest Developments

11.16 Thermaflex

- 11.16.1 Thermaflex Company Information
- 11.16.2 Thermaflex Data Center Insulation Product Offered
