The global Data Center MPO Connectors market size is predicted to grow from US$ 123 million in 2025 to US$ 187 million in 2032; it is expected to grow at a CAGR of 6.3% from 2026 to 2032.

Data Center MPO Connectors are a type of high-density fiber optic connector widely used in modern data centers to support high-speed, high-bandwidth network connections, especially for 40G, 100G, 400G, and future 800G+ optical links. In 2024, global Data Center MPO Connectors production reached approximately 728 k units, with an average global market price of around US$ 150 USD per units. The production capacity for Data Center MPO Connectors in 2024 was approximately 750 k units. The typical gross profit margin for Data Center MPO Connectors is between 25% and 35%. The MPO connector industry chain for data centers includes upstream suppliers of raw materials and key components, midstream MPO connector manufacturers, and downstream data center operators and system integrators. Upstream provides essential materials such as optical fibers, ceramic ferrules, polishing materials, and injection-molded parts. Midstream companies design and produce MPO connectors, MTP adapters, and fiber patch cords, ensuring high-density, high-speed, and low insertion-loss performance. Downstream users include data center operators, optical network integrators, and large enterprise IT departments, which purchase MPO connectors for building high-density fiber distribution frames, backbone fiber lines, and high-speed optical networks. The industry is characterized by rapid technological upgrades, strict standards, and high requirements for insertion loss and return loss.

United States market for Data Center MPO Connectors is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
