## Abstracts

The global Data Center PG25 Cooling Fluid market size is predicted to grow from US\$ 396 million in 2025 to US\$ 615 million in 2032; it is expected to grow at a CAGR of 6.7% from 2026 to 2032.

Data Center PG25 Cooling Fluid refers to a specific type of heat-transfer fluid?PG25?utilized in liquid cooling systems for data centers, specifically those employing cold-plate or direct-to-chip cooling architectures. Typically, it consists of a 25% aqueous solution of propylene glycol, supplemented with corrosion inhibitors, anti-corrosion agents, and biostabilizing additives. It is engineered expressly as a liquid cooling medium for data centers, server farms, and High-Performance Computing (HPC) facilities.

The upstream supply chain for Data Center PG25 Coolant primarily comprises materials such as industrial-grade or high-purity propylene glycol, high-purity or deionized water, copper and aluminum corrosion inhibitors, organic acid-based inhibitors, and pH buffering agents. Among these components, the propylene glycol and the corrosion inhibitor system are the critical factors determining the base cost, low-temperature antifreeze performance, material compatibility, and long-term stability of the coolant. The midstream segment involves coolant manufacturers, who undertake processes such as formula development, precise dilution, and the compounding of corrosion inhibition systems. The downstream market consists primarily of high-density data centers, intelligent computing centers, and liquid cooling systems for AI servers.

In 2025, the global sales volume of Data Center PG25 Coolant is projected to reach approximately 90,000 tons, with a global average price of approximately \$4,500 per ton; leading manufacturers in the industry are expected to maintain gross margins ranging

from 30% to 45%.

United States market for Data Center PG25 Cooling Fluid is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Data Center PG25 Cooling Fluid is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Data Center PG25 Cooling Fluid is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
