The global DC Inverter Rotary Compressor market size is predicted to grow from US$ 1086 million in 2025 to US$ 1453 million in 2031; it is expected to grow at a CAGR of 5.0% from 2025 to 2031.

Modern electronic technology and market development of semiconductor components enabled the control inverter compressor control processors, which form the most 'smooth' curves current and power, optimize 'Unwrap' the control pulses in such a way as to minimize power consumption and 'smooth' transition moments. Compressor with inverter DC can increase the efficiency of the air conditioner, thus reducing power consumption saves costs. This system is much more economical and safer than air conditioners with a constant output of the compressor.
