A DC ion hair dryer is a hair dryer that uses DC power and ion technology. Compared with traditional AC hair dryers, DC ion hair dryers have the following characteristics: 1. DC power supply: DC ion hair dryers are powered by DC power supply. Compared with AC power supply, DC power supply has more stable output current and voltage, and can provide more uniform and stable of wind and heat. 2. Ion technology: The DC ion hair dryer generates negative ions through the built-in ion generator and releases the negative ions to the air outlet of the hair dryer. The negative ions can neutralize the positive charges in the air, reduce the generation of static electricity, make the hair smoother, softer, and reduce Frizz and static. 3. Energy saving and environmental protection: DC ion hair dryers use DC power supply, which can convert electrical energy into wind and heat more efficiently than traditional AC hair dryers, saving energy consumption. At the same time, ionic technology can reduce thermal damage to hair and is more environmentally friendly. 4. Multi-speed wind speed and temperature

adjustment: DC ion hair dryers usually have multi-speed wind speed and temperature adjustment functions. The appropriate wind speed and temperature can be selected as needed to meet the needs of different hair types and styles.
