Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Debt-based crowdfunding encompasses several different types of crowd based lending. These include mini-bonds, peer-to-peer lending (sometimes known as 'peer-2-peer' or 'P2P' lending) and invoice financing.

Essentially, a large amount of retail investors (the crowd) lend money through a platform to a business or individual. In removing many of the middlemen that would be involved if the transaction happened through a bank, debt-based crowdfunding can keep the costs down for borrowers while potentially giving the lenders improved rates of return.
