## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Unlike debt consolidation, which merges multiple balances into one loan (ideally with a lower interest rate), debt relief companies, sometimes referred to as debt settlement companies, help clients pay off their debt by negotiating a reduced balance. During the negotiation, clients stop making payments and save for debt payoff in a savings account. When an agreement with creditors has been reached, the debt is settled with the funds from that account.

The global Debt Relief Service market size is projected to grow from US\$ 465 million in 2024 to US\$ 879 million in 2030; it is expected to grow at a CAGR of 11.2% from 2024 to 2030.
