Abstracts

The global Decaffeinated Tea Extract market size is predicted to grow from US$ 164 million in 2025 to US$ 274 million in 2032; it is expected to grow at a CAGR of 7.7% from 2026 to 2032.

In 2025, the global sales volume of decaffeinated tea extract was approximately 6.3 thousand metric tons on a dry-solids-equivalent basis, with an average selling price of approximately US$26.7 per kilogram. Decaffeinated tea extract is a food and nutritional ingredient produced from the leaves, buds, or processed tea of Camellia sinensis through extraction, separation, concentration, selective decaffeination, and drying. It is commonly supplied as powder extract, instant tea powder, liquid extract, or concentrate. The product uses technologies such as supercritical carbon dioxide separation, food-grade solvent extraction, adsorption resin treatment, membrane separation, or combined purification to substantially reduce residual caffeine while retaining tea polyphenols, catechins, EGCG, theanine, soluble tea solids, and characteristic tea flavor components. These technical features support low-caffeine formulations that require controlled active-ingredient content, desirable taste, good solubility, and consistent product quality. Decaffeinated tea extract is mainly used in functional beverages, ready-to-drink tea, powdered drinks, dietary supplements, foods, personal care products, and other nutrition and health products.

Market growth is primarily driven by rising demand for low-caffeine products, broader use of functional tea compounds, and advances in extraction and purification technologies. Greater consumer attention to sleep management, reduced stimulant intake, and all-day beverage consumption is increasing demand for decaffeinated ready-to-drink tea, functional beverages, and powdered drinks. At the same time, growing use of tea polyphenols, catechins, and EGCG in dietary supplements, functional foods, and

personal care formulations is supporting higher-value products with lower bitterness, tighter caffeine control, and greater active-compound standardization. Improvements in supercritical carbon dioxide processing, membrane separation, adsorption resins, and combined purification are further enhancing flavor, solubility, active-ingredient retention, and batch consistency.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Decaffeinated Tea Extract Industry Forecast” looks at past sales and reviews total world Decaffeinated Tea Extract sales in 2025, providing a comprehensive analysis by region and market sector of projected Decaffeinated Tea Extract sales for 2026 through 2032. With Decaffeinated Tea Extract sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Decaffeinated Tea Extract industry.

This Insight Report provides a comprehensive analysis of the global Decaffeinated Tea Extract landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Decaffeinated Tea Extract portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Decaffeinated Tea Extract market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Decaffeinated Tea Extract and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Decaffeinated Tea Extract.

This report presents a comprehensive overview, market shares, and growth opportunities of Decaffeinated Tea Extract market by product type, application, key manufacturers and key regions and countries.
