Decamethylcyclopentasiloxane, referred to as D5, is also called cyclopentasiloxane, and its chemical formula is  $C_{10}H_{30}O_5Si_5$ . It appears as a colorless, transparent liquid with no odor. It has good compatibility with most organic solvents such as alcohols and is easily volatile. There is a danger of explosion when mixed with air.

Decamethylcyclopentasiloxane has extremely low surface tension, can quickly penetrate into the skin, has good lubricity, can form a protective film on the skin surface, and can carry active ingredients, making it easier to be absorbed by the skin. Therefore, it can be used in the field of personal care products, such as used to produce face creams, body lotions, shampoos, shower gels, antiperspirants, etc. In addition, decamethylcyclopentasiloxane can also be used in industrial fields as solvents, cleaning agents, organic synthesis intermediates, etc.

In the fields of cosmetics, skin care products, and personal care products, decamethylcyclopentasiloxane (D5) and octamethyl cyclotetrasiloxane (D4) are two common ingredients. Octamethyl cyclotetrasiloxane has certain toxicity and its use is restricted in some countries. Decamethylcyclopentasiloxane can replace it.
