According to our LPI (LP Information) latest study, the global Deep UV KrF and ArF Photoresist market size was valued at US\$ million in 2022. With growing demand in downstream market and recovery from influence of COVID-19 and the Russia-Ukraine War, the Deep UV KrF and ArF Photoresist is forecast to a readjusted size of US\$ million by 2029 with a CAGR of % during review period.

The research report highlights the growth potential of the global Deep UV KrF and ArF Photoresist market. With recovery from influence of COVID-19 and the Russia-Ukraine War, Deep UV KrF and ArF Photoresist are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Deep UV KrF and ArF Photoresist. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Deep UV KrF and ArF Photoresist market.

Deep UV KrF and ArF photoresists are key materials used in semiconductor manufacturing for deep UV lithography processes. KrF photoresist uses krypton fluoride laser as the light source, with a wavelength of 248 nanometers. KrF photoresist is suitable for relatively large process nodes, has high resolution and a long history of practical application. ArF photoresist uses an argon fluoride laser as a light source with a wavelength of 193 nanometers. ArF photoresist is suitable for smaller process nodes, with higher resolution and smaller line width capabilities.

Deep UV KrF and ArF photoresists differ in terms of light source wavelength, resolution, line width, process application, etc. It is necessary to select the appropriate deep UV photoresist based on specific process requirements, cost, equipment compatibility and other factors. At the same time, the selection of photoresist must also consider compatibility with other process steps (such as masks and photolithography machines).
