The global Deltamethrin market size is predicted to grow from US\$ 375 million in 2025 to US\$ 462 million in 2031; it is expected to grow at a CAGR of 3.5% from 2025 to 2031.

Deltamethrin is a non-systemic synthetic pyrethroid insecticide with contact and stomach action. Deltamethrin is effective against a wide range of insect pests, which include Lepidoptera, Homoptera; particularly Aphids and Psylla but also some Coccidea and Cicadellinea, Heteroptera, Thysanoptera; selected thrips species, Diptera, Coleoptera and Orthoptera.

The world's major deltamethrin manufacturers include Bayer Crop Science, Yangnong Chemical, Gharda Chemicals, Tagros and Red Sun, and the top five manufacturers in the world account for more than 40% of the market share.

Currently, China is the world's largest deltamethrin market, accounting for more than 30% of the market share. The ban on highly toxic organophosphorus pesticides and the gradual withdrawal of neonicotinoid insecticides from the Chinese market have promoted the growth of the market share of pyrethroid pesticides.
