Abstracts

The global Dermocosmetic Products market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

The field of dermo-cosmetics is a branch of science that combines cosmetology and dermatology. Simply put, it refers to specialized skin care products produced in consultation with dermatologists to improve the appearance of skin and treat various skin issues. Formulated for local application, dermo-cosmetics are made to preserve the health and beauty of skin, including the scalp and hair. Dermo-cosmetics differ from regular skin care products because they work deeply into the dermis, the second layer of the epidermis. Since the molecules in dermo-cosmetic products are finer, they are better able to penetrate skin cells.

The total size of the global beauty industry in 2022 was about US\$ 427 billion, with the sales of skin care products was about US\$ 190 billion, perfumes US\$ 70 billion, color cosmetics US\$ 80 billion, hair care products US\$ 90 billion. Head beauty and personal care companies are concentrated in Europe and the United States. More than one-third of the top 100 companies are headquartered in the United States, and 22.9% of the companies are located in France.
