Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

The global Desk Booking Software market size is projected to grow from US$ million in 2022 to US$ million in 2029; it is expected to grow at a CAGR of % from 2023 to 2029.

Rapidly growing global population, emerging artificial intelligence, cloud computing, and big data technology developments, and significant cost reductions are the key factors driving the desktop booking software market revenue.

Desk booking solutions streamline the process of reserving individual desks in a workspace. These solutions allow employees to browse and reserve available desks across a company’s floor plan, which is often interactive, providing 3D visuals and immersive features for users exploring their workspace. Desk booking software is often used in hybrid workplace models, in which a company’s workforce is given the flexibility to decide which days to be office-based and which days to work remotely. However, desk booking software can be used with both fixed (assigned) and open (unassigned) floor plans, making it a great solution for companies that have both full-time office-based and hybrid employees.

LPI (LP Information)' newest research report, the “Desk Booking Software Industry Forecast” looks at past sales and reviews total world Desk Booking Software sales in 2022, providing a comprehensive analysis by region and market sector of projected Desk Booking Software sales for 2023 through 2029. With Desk Booking Software sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Desk Booking Software industry.
