With the advent of the digital age, printers have become an important tool for people to obtain paper output. Whether in a home use or a business environment, a printer remains a must-have device. Offices need to print various documents, reports and forms, students need to print academic papers and assignments, commercial organizations need to print promotional materials and marketing materials, etc. Therefore, the printer market has a steady demand. As technology continues to advance and innovate, the printer market is also evolving. The introduction of new technologies, such as 3D printing technology, has brought new growth opportunities for the printer market. In addition, the demand for environmentally friendly printers is also increasing, driving the trend of sustainable development and energy saving and emission reduction.
