The global Desktop Power Adapter market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Desktop power adapter is a power supply conversion device for small portable electronic equipment and electronic appliances. Its function is to convert AC power to DC power, or to convert one DC voltage to another DC voltage. The characteristic of the desktop power adapter is that its body needs to be placed on the desktop instead of directly plugged into the socket. It requires an AC line to connect to the mains power, and then a DC line to connect to the device that needs power. The advantage of the desktop power adapter is that it can withstand greater power and has better heat dissipation performance. It is suitable for notebooks, monitors, printers and other equipment. The disadvantage of the desktop power adapter is that it takes up a lot of space, is inconvenient to carry, and can easily cause cable clutter.

United States market for Desktop Power Adapter is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Desktop Power Adapter is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
