Abstracts

The global Detox Support Supplement market size is predicted to grow from US\$ 1070 million in 2025 to US\$ 1654 million in 2032; it is expected to grow at a CAGR of 6.5% from 2026 to 2032.

A detox support supplement is a dietary supplement designed to support the body's natural detoxification processes. The term 'detox' in this context generally refers to the process of removing or neutralizing harmful substances (toxins) from the body. Detox support supplements often contain a combination of vitamins, minerals, antioxidants, and herbal extracts believed to aid in detoxification and promote overall well-being.

Consumers are increasingly looking for clean-label products with transparent ingredient lists. Detox support supplements that clearly communicate the source and purpose of ingredients, as well as their manufacturing processes, are likely to be more appealing to health-conscious consumers.
