The research report highlights the growth potential of the global Diabetic Foot Ulcers and Pressure Ulcers market. Diabetic Foot Ulcers and Pressure Ulcers are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Diabetic Foot Ulcers and Pressure Ulcers. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Diabetic Foot Ulcers and Pressure Ulcers market.

Diabetic foot ulcers, are most common chronic wounds in patients suffering from diabetes, and lack of proper treatment of the foot ulcers often lead to progression of the wound resulting in lower extremity / foot amputation. Pressure ulcers are often a cause of lack of movement of the patients, longer hospital stays, and rising geriatric population leading to increasing prevalence of chronic diseases requiring increasing number of hospital admissions.

According to the Global Use of Medicines 2023 released by IQVIA Institute, the global drug expenditure in 2022 was about US\$1.48 trillion (excluding COVID vaccine and

treatment-related expenses), and it is predicted to grow at a rate of 3%-6% in the next few years. In terms of drug expenditure, this number in China was about 166 billion dollars in 2022. It is expected that the expenditure on medicines will increase in the next few years. From the perspective of demand, the trend of population aging, the increase of residents' wealth and the improvement of health awareness will drive the demand for medicines.

Global Use of Medicines 2023 shows that the U.S. market spent about US\$ 62.9 billion on medicines in 2022 on a net ex-factory basis. Overall growth slows as the Inflation Reduction Act (IRA) spends US\$64 billion to reduce prescription drug prices, and the adoption of new treatments is expected to increase over the next few years. Besides, ex-factory discounts and rebates in drug distribution, the impact of patent expiration, and generic or biosimilar competition will also affect the U.S. pharmaceutical market.
