Diamond saw blade is a cutting tool that is widely used in the processing of stone, ceramics and other hard, brittle or abrasive materials. Diamond blades are made up of two components: the steel core and the segment (diamond crystals and a bonding system). The core is typically a round flat metal disc used to support the outer segments. The diamond can be attached to the core using vacuum brazing, sintering, or laser welding. Diamond saw blades are classified by various processes, such as sintered diamond saw blades (cold pressed sintering and hot pressed sintering), welded diamond saw blades (brazed and laser welded), and electroplated (brazed) diamond saw blades. The technology of diamond saw blades continues to improve, including the optimization of blade materials, the improvement of cutting efficiency, and the enhancement of durability. These technological advances have enabled diamond saw blades to be widely used in more fields and improved their market competitiveness. The research and development and application of new materials, such as different types of diamond coatings and improvements in matrix materials, have also improved the performance of diamond saw blades. With the rapid development of infrastructure construction in the world and China, the demand for diamond saw blades continues to grow. Especially in emerging markets such as China and India, the accelerated urbanization process has driven the demand for building materials, which in turn has driven the market demand for diamond saw blades. The rapid development of the building materials industry, stone processing, metal cutting and other fields has also promoted the growth of the diamond saw blade market.

There are many internationally renowned brands in the diamond saw blade market, which have competitive advantages in technology, brand influence, etc. At the same time, there are also many local brands in the market, which enhance their competitiveness through technological innovation, improving product quality and optimizing services. The main global diamond saw blade manufacturers include LEUCOM, Stanley Black and Decker (Lenox), Bosch, EHWA, AT&M, Jiangsu Fengtai Tools, Makita, etc. The top five global manufacturers account for about 20% of the market share. Asia Pacific is currently the world's largest diamond saw blade consumer market, accounting for more than 52% of the market share, followed by North America and Europe, which together account for more than 42% of the market share.
