Diamond Suspensions and Diamond Pastes are diamond abrasive liquid products used for polishing and grinding.

Diamond Suspensions are abrasive materials that suspend diamond particles in a liquid. The size of these particles usually ranges from a few microns to tens of microns and can be selected according to needs. Diamond Suspensions are suitable for general polishing and grinding applications such as surface treatment of metals, glass, ceramics and other materials.

Diamond Pastes are abrasive materials that mix diamond particles in a viscous matrix, usually composed of paraffin, oil, or other viscous substances. Diamond Pastes are usually used in situations where higher precision polishing is required, such as surface processing of high-precision parts such as optical components and semiconductor chips.
