Diaphragm Pump Controller is an electronic device used to control diaphragm pumps. A diaphragm pump is a pump that sucks and discharges liquids by compressing a diaphragm, and is typically used to handle corrosive, viscous, or volatile liquids. The diaphragm pump controller can achieve precise control of the pump by adjusting the working parameters of the pump, such as pressure, flow, frequency, etc., so as to meet specific industrial application requirements. Diaphragm pump controllers usually have

two control modes, manual and automatic, and can be integrated with other automation equipment to achieve a more efficient production process.
